

Synthetic rope

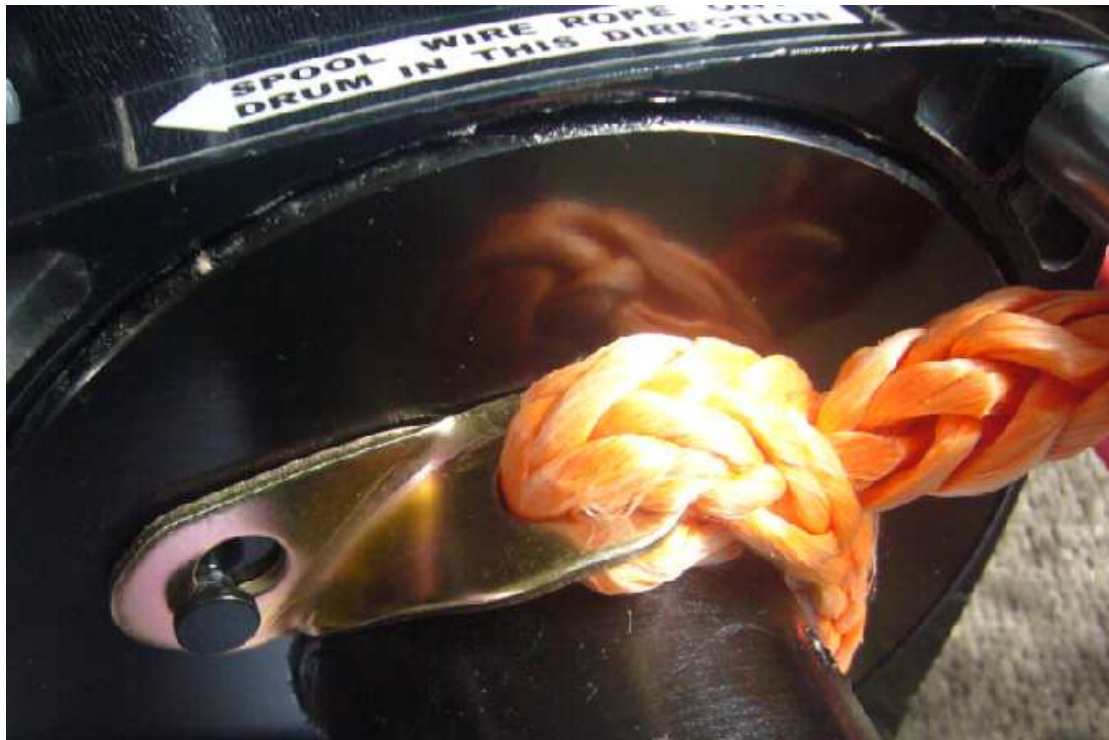

1. Please thread the rope end (which is without delta-ring) through the hole of the thimble for about 10cm as per the picture below.

2. Then thread the same rope end through the middle of the rope of the other side as per the picture below.

3. Attach the thimble to the pin of the drum, please ensure that the flat face of the thimble is closely attached to the drum.

4. Wind the part of rope with cover from the thimble side. Please wind this part with another part of the rope (the part of 10cm-length through the thimble hole) beneath as per the picture below.
