

Instructions

1. The awning will fit simply and easily to the side of any roof rack, bolts and base plates are included.

2. Insert bolts into track of mounting base and place plate, as per figure below.

3. Attach the awning to car roof bars broadside in 2 places, insert another slide plate with the base plate to hug the bar.
4. Tighten all the nuts, ensure the awning firmly mounted on bars and in a stable condition. Place the roof frame and legs, using pegs to fix guy ropes on ground for use in windy conditions
